-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the use of the legal phraseology, "said" on lines 3 and 5, is not permitted. Correction is required. See MPEP § 608.01(b).

### *Claim Objections*

3. Claims 1-2 are objected to because of the following informalities:

Re claims 1 and 2: The terms "1<sup>st</sup>" and "2<sup>nd</sup>" should be spelled out such as "first" and "second", respectively.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2876

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Vogelgesang (US 3,755,730).

Vogelgesang teaches a method of providing a machine-readable indicia (11) on a media (10) having a protective overlayer including the steps of:

providing a 1<sup>st</sup> machine-readable indicia (11) in an image layer on the media; and

providing a 2<sup>nd</sup> machine-readable indicia (14 or 16) in a protective overlayer that is identical in content to, and in register with the 1<sup>st</sup> machine-readable indicia in the image layer (“A protective layer, illustrated as a prime coat 14 and a finish coat 16 of paint ... has been applied over the part 10 and the indicia 11” (col. 4, lines 21-24)) (abstract; col. 4, line 15 through col. 5, line 4).

### *Conclusion*

Examiner’s note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Talvalkar (US 4,923,749) teaches thermal transfer ribbon. Romaine (US 6,562,178) teaches scratch-resistant, self-laminated printed materials and methods for making same. Pekko et al. (US 3,864,855) teaches destructible label system...

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly D. Nguyen whose telephone number is 571-272-2402.

The examiner can normally be reached on Monday-Friday 7:30-4:30.
